www.fcoterroba.com

i'm a full-stack developer with a product vision and a human-centered approach. i'm passionate about creating functional and aesthetically pleasing digital experiences, bridging the gap between technical and strategic thinking.

laboral experience

founder

ViviFind
2025 - present

i developed an AI-powered web platform that, after a single user registration, cross-references apartment searches and automatically recommends the most suitable ones.

full stack developer

Tu Trámite Fácil
2025 - present

we work in Vue, Laravel and Python to create the largest and best public aid platform in the country.

full stack developer

Betterfly
2024 - 2025

using Laravel, Python, and React, we created one of the best flexible compensation platforms on the market.

full stack developer

Avature
2021 - 2024

using Laravel, Python, and Javascript, we created one of the world's best hr solutions.
